

SARVESH PAWASKAR

Data Engineer | Data Analyst | ETL & Cloud Data Pipelines | Power BI | Azure | Microsoft Fabric

Mumbai, Maharashtra, India | +91-7977368328 | sarveshpawaskar514@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Data Engineer and Data Analyst with 9+ months of professional experience building scalable ETL/ELT pipelines, cloud-based data platforms, and enterprise business intelligence solutions. Proven expertise in Microsoft Fabric, Azure Synapse Analytics, Databricks, SQL, Python (PySpark, Pandas), and Power BI, with a strong track record of improving pipeline performance, data quality, and reporting efficiency. Adept at translating complex datasets into actionable, executive-ready insights. PG Diploma in Big Data Analytics (CDAC) from Sunbeam Institute of Technology, Pune.

CORE SKILLS

- Programming & Query Languages: Python, SQL, NoSQL, PySpark, Pandas
- Data Engineering & Big Data: ETL/ELT Pipeline Development, Data Ingestion, Data Transformation, Data Modeling, Pipeline Orchestration, Delta Lake, Apache Airflow, Data Quality & Reconciliation
- Cloud & Data Platforms: Microsoft Fabric, Azure Synapse Analytics, Azure Data Factory, Azure Key Vault, Databricks, AWS S3, AWS Glue
- Analytics & Visualization: Power BI, DAX, MS Excel, Tableau, Machine Learning, Deep Learning

PROFESSIONAL EXPERIENCE

Data Analyst — DataPhi-AI, Pune

Sep 2025 – May 2026

- Completed intensive hands-on training in Power BI, Azure Synapse Analytics, ETL pipeline development, and end-to-end data engineering workflows, delivering real-world dashboards and cloud-based data solutions.
- Designed, developed, and maintained 2 interactive Power BI dashboards for business reporting and KPI tracking, enabling real-time, data-driven decision-making for stakeholders.
- Acted as primary point of contact for daily data operations, ensuring rapid resolution of pipeline failures and minimizing operational downtime.
- Enhanced data monitoring workflows using Apache Airflow by optimizing pipeline logic, adding monitoring columns, and resolving orchestration issues to improve reliability.
- Partnered with cross-functional stakeholders to ensure data accuracy, consistency, and on-time reporting delivery across multiple business processes.
- Architected and managed an enterprise master ETL pipeline with multiple invoke pipelines in Microsoft Fabric, driving data ingestion and transformation across Oracle Fusion and Salesforce source systems spanning 58 tables.
- Built custom scripts for data profiling, reconciliation, and validation, strengthening overall data quality and pipeline reliability.
- Diagnosed and resolved Azure Key Vault integration issues within Microsoft Fabric, restoring secure credential management and ensuring uninterrupted pipeline execution.
- Implemented VACUUM and OPTIMIZE maintenance routines on Delta tables, reducing storage overhead by 35% and improving query performance by 28%.
- Currently engineering a checkpoint-based pipeline recovery mechanism to resume failed jobs from the last successful execution point, reducing redundant processing and increasing pipeline resilience.

Tech Stack: Microsoft Fabric, Azure Synapse Analytics, Power BI, Apache Airflow, SQL, Python, ETL Pipelines, Azure Key Vault, Delta Lake

KEY PROJECTS

Logistics Data Engineering Pipeline

2025

Azure Synapse | Azure Data Factory | Databricks | Delta Lake

- Built a control table-driven ETL pipeline processing 2M+ records across 14 tables using Azure Synapse, Azure Data Factory (Copy Activity), and Databricks, ingesting data from REST APIs and multiple source systems.

- Designed a scalable Medallion Architecture (Bronze, Silver, Gold) on Delta Lake for streamlined data ingestion, transformation, and data modeling.
- Implemented ADF triggers, Delta Lake, and Azure Key Vault integration for secure, automated, parameterized, and metadata-driven pipeline execution.

Customer Spending & Credit Insights Power BI Dashboard

2025

Power BI | DAX | SQL

- Developed a 3-page self-service Power BI dashboard analyzing 2M+ customer transaction records across credit and spending categories, directly applicable to credit card and personal loan analytics in financial services.
- Engineered 70+ DAX measures for KPI tracking, year-over-year trend analysis, and customer segmentation; built drill-through reports and dynamic slicers enabling self-service analytics for business teams.

EDUCATION

PG Diploma in Big Data Analytics (CDAC)

Graduated 2025

Sunbeam Institute of Technology, Pune — Percentage: 75.25%

Bachelor of Engineering — Electronics and Telecommunications

Graduated 2024

JSPM's JSCOE, Pune — CGPA: 8.53/10

AWARDS & CERTIFICATIONS

- 1st Prize — National Level GMRT Project Competition, Pune (2024); ranked first among participants from colleges across India.
- Winner — Machine Learning & Data Visualization Hackathon, Sunbeam Institute of Technology, Pune (2024).
- Python: Basic to Advanced — TalentBattle (2023).
- Fundamentals of Artificial Intelligence & Machine Learning — VOIS (2023).

WHY HIRE ME

- Hands-on, production-grade experience across the modern data stack — Microsoft Fabric, Azure Synapse, Databricks, and Power BI — built through real enterprise pipelines, not just coursework.
- Demonstrated measurable impact: 35% reduction in storage overhead and 28% improvement in query performance through proactive Delta Lake optimization.
- Proven ability to own data reliability end-to-end — from ingestion and transformation to monitoring, reconciliation, and secure credential management.
- Strong cross-functional collaborator who bridges engineering and business teams, translating complex data into clear, self-service insights for stakeholders.
- Fast learner with a track record of competition wins and certifications, bringing both technical depth and a growth mindset to every project.
